EASY TECH TIPS

Microsoft Word Tip

Test this tip when you are next in a word document.

Type a short sentence in CAPITALS. Now highlight the sentence and hold down the shift key whilst pressing the F3 key. See how the case format changes.

A LITTLE LAUGHTER

Two little boys are sitting on the beach examining each other's navels. "What are they?" "Well, when you are born there's a piece of rope hanging out there. And they cut it off and twist the end around and tape it inside." "What for?" "So you won't go pssssshhh and go down."

DATALOGIC HERON D130 Scanner

One of the most popular cabled scanners we sell. Take the scanner right out of the box and plug it into your USB port on your PC. Scans barcodes for all library systems and has a special hands free stand that automatically goes to hands free mode when the scanner is docked. A 2.0 metre cable allows plenty of movement around a busy desk.

DATALOGIC TOUCH LITE 65 Scanner

For a budget priced scanner you cannot go past the TOUCH 65. A choice of trigger scanning or always on is an option. The 2.0 metre cable is standard as with the more expensive scanners and is sold with a USB connector.

The TOUCH 65 is ideally suited to light to moderate volumes and will continue to perform well for many years.
